Excerpts of state statutes are referred to...

~On July 18, 2022 Haven Township Board passed a motion (by Eric Meyer) to hand-tabulate the races as well as use the Dominion voting system, so they could compare the number of votes for each candidate between the two methods during the Primary Election August 9<sup>th</sup> to see if the results were equal. Head Election Judge Penny has been an EJ since the 1970's, and hand counting was the only way they counted the votes, ~~she~~ would hand count the race results according to the board's wishes. We all want to make sure Haven Township is accurate on all accounts...

~ On August 9<sup>th</sup>, Primary Day, I arrived at this town hall, to observe the hand-tabulating process, but the doors were **locked**.

Statute **206.86 subd 3**, "...open to the public... under the direction of the official in charge of elections in each municipality where an electronic voting system is used..."  
**subd 4**, "...automatic tabulating equipment ...The results ...available to the public..."

~\***204C.19 subd1** "...hours for voting have ended and all voting has concluded...shall immediately count the votes cast at the election... at the polling place and shall be public..."

However, I witnessed no hand-tabulating of the races which violated the decision of the board. The Election Judge Guide of 2022 even explains the Hand-Count p.49-52. Since it is in the current Election Judge Guide it must be an option.

~MN Statute **206.58** clearly defines townships' authority to either use or refuse the electronic voting system. Use of the machines was conditional on hand-counting the votes in each race for comparison.

**206.58 subd 1. MUNICIPALITIES.** "The governing body of a municipality, at a regular meeting or...special meeting called for the purpose, may provide for the use of an electronic voting system..." **subd 3** "...The governing body of the municipality shall give approval before an electronic voting system may be...used in the municipality under the authority of this section."

~Due to the fact that the Haven Township Supervisors passed a motion (to hand-count the number of votes for each candidate and compare those totals to the totals tallied by the Dominion machine in accordance with Haven Township's statutory authority as defined in **206.58 subdivisions 1 & 3**) and that the motion (which was conditional on hand-counting the votes in the races) was willfully and with knowledge disregarded by the HEJ, the HEJ caused MN State Statutes to be violated. Additionally I believe that the HEJ overstepped her authority and violated **204C.19** and **206.86 subd 3** denying my right to see the unofficial results based on her statement that I was not there promptly at 8 p.m. In fact the results tape within her reach.
